SUMMARY

After 2 years as an IT Consultant, I am looking to join a company to make a lasting impact and take full ownership of the outcomes in a hands-on position. I have held management positions where I did not feel like I was making any difference & always relied on others for the project to move forward. This is why I am now looking to take again a technical position where I would without a doubt excel due to my problem-solving skills & competencies acquired across studies, work & personal projects.

VALUE PROPOSITION

Speed & Quality
No Matter the obstacles, the delivery is always on time and meets all requierements

Versatility
I have the ability to adopt multiple roles, technical & managerial. No matter the skills needed, I find a way to make it happen.

Full Responsibility
Ready to take on any challenge and to accept the responsibility of the outcome
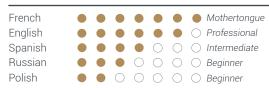

PROFESSIONAL SKILLS

Project Management
- Planning & Budget
- Commitees
- Communication
- Problem Solving

Technical Skills
- Architecture / Cloud
- Security
- Mathematical Finance & Operational Research
- Statistics & Machine Learning
- Data Analytics & Tableau Software
- Development
